

Eco Friendly Seating Fabric

Made with Recycled Yarn by La France

- * Eco Friendly fabric is an every day reminder that you are Sensitive to the Environment and Sustainability.*
- * Made of recycled yarn in an energy efficient weaving process by LaFrance Industries.
- * Yarn is produced using both post-consumer waste (plastic water bottles) and post production fiber waste.
- * Reclaims valuable renewable resources from the waste stream and converts them into something useful. It takes less energy resources to produce than if starting over from scratch.
- * High performance fabrics for transit and motor coach seating. Durable and easy to clean.
- * Superior color fastness and color retention characteristics which is a concern with many traditional transit seating fabrics.
- * Many patterns and colors readily available.

Made in USA
