

AMAYA

ASTRON

 **Torino G**

# Torino G

## FOR ALL GENERATIONS

### SPECIAL FEATURES:

- The shoulder belt comes out from the side of the backrest so the passenger is free of back and shoulder discomfort.
- This seat includes our well known ergonomic design for comfort and the additional knee room provided in all the Amaya-Astron seat models.
- Fold down aisle armrest and fixed at wall side.
- Mechanical recline mechanism with 5 years warranty.

The Torino G seat incorporates an internal three points seat belt system, developed for adults and children with a height of at least 40"; smaller children require a booster seat.

Removable back panel for easy maintenance on seat belts and covers.

Restraint anchorage system for child car seat.

It is the only seat belt system in our industry that adjusts automatically to the passenger's height.

Safety

The "Energy Absorbing Back Panel" is a new development that provides full compartmentalization in case of frontal crashes, protecting belted and unbelted passengers.

Torino G fulfills the Federal Motor Vehicle Safety Standards (FMVSS) 208, 209, 210, 222, 225 and also the European M2 regulation for 3 points seat belt.

In order to assure security to all the family members, Amaya-Astron Seating tested the Torino G using child and adult dummies with different heights and weights.
