CLEANING

In general, most household soil can be easily cleaned with warm soapy water and several clear water rinses. Moderate scrubbing with a medium bristle brush will help to loosen the soiling agent from the depressions of embossed surfaces. Certain commercially available products clean routine household spills from vinyl very effectively. Check label on product to see if recommended. Full strength rubbing alcohol or bleach diluted with water may be tried if the above suggestions do not work. Certain household cleaners could cause damage or discoloration of the vinyl product and should be avoided.
