

## General Maintenance:

FXC® with anti-microbial fabrics are high-performance technical materials engineered to provide excellent moisture barrier protection and stain resistance. FXC® with anti-microbial is a fabric and should be maintained as such. Here are a few guidelines to help maintain its high-performance features:

- Clean spills and stains promptly.
- After cleaning, always rinse with fresh water to remove any soap residue from the surface.
- Establish a cleaning cycle to resist soil build-up.

## Cleaning Procedure:

1. Blot excess spillage from the fabric using an absorbent cloth.
2. Saturate stain with appropriate cleaning agent (see chart).
3. Using a soft clean towel or brush, clean in a circular motion until stain is lifted.
4. Rinse with fresh water to remove any soapy residue.
5. Allow to air dry or vacuum extract.

*Some difficult stains may require a second cleaning to obtain satisfactory results.*

## Stain Removal Guidelines:

Stain	Code
Berries	D
Blood	D
Candy	D
Catsup	D
Chocolate	D
Coffee	D
Cola Drinks	D
Crayon/Markers	D
Earth (dirt)	W
Foods (greasy)	S
